| 10306 | Texture Replacer | Utilities | MMH | 95-5284 | Jochen Gehring aka JOG | 2009-05-12 | This is a commandline tool to replace textures in one or several .NIF files. It might be a bit more complicated than GUI-Reskinning tools, but this one is much more powerful since it can replace several textures in several files at once. Also the filename of the new texture... |
