11032	Attribute health	Tweaks	MMH	90-9885	Kuriken	2005-07-21	Changes how health is calculated by making it (200*strength + 50*Intelligence + 200*Willpower + 75*Speed + 150*agility + 250*endurance + 10*Luck) / 350 + 2*Level. It is a heavily modified version of Bell-chan's Independantheath script so all props to him.
